## SOURCE

- One of the elements of the Soviet occupation program after the war in North Korea was increased output from mines. All mines were ordered to continue producing at their former rate, and increase of production were ordered at Kumhak-tong (127-42, 38-30), Komdok (128-21, 40-36), Songchon (126-22, 39-18), Koksan (126-30, 38-57), and Songhung (126-28, 39-06) mines. With Soviet assistance, Komdok, Koksan, Song-chon, Unchang-dong (125-08, 40-07), and Suan (126-22, 38-47) mines were developed and expanded.
- 2. The economic planning program of 1947 emphasized the increase of gold and silver production and resulted in an output 50 to 70 percent higher than that of the previous year. Other mine products went up 100 to 300 percent as of the same period. To aid in the mining of barium sulphate, talc, monazite, beryl, lead, zinc, graphite, tungsten, magnesite, and columbite, materials were shipped from the USSR to North Korea, including wire rope, compressors, surveying instruments, copper wire, electric fittings, rock drills, research instruments and laboratory equipment, borers, processing chemicals, iron pipa, etc.
- 3. From 1948 to 1949, the planned economic program increased production about 50 percent. Beginning in 1949, the mining of rare and strategic minerals was stressed, and monazite mines such as those of Sinchon, Cholsan, and Taedong were developed.\*
- Among the mines in operation are the following, and their principal products, most of which were sent to the USSR:
  - Magnesite (MgO3 -- CaO 0.08, MgO 40.15, SiO2 0.48) Yongyang-ni (128-51, 40-54) mine, Puktuil-myon, Tanchon County, South Hamgyong; NgO3 to 30 percent in unrefined ore.
    Nameye (128-50, 41-13) mine, Nameye-myon, Hyesan County, North Hamgyong;
    NgO3 content 38 percent in unrefined ore.
  - Barite (BaSOj, 97.28, Fe<sub>2</sub>O<sub>3</sub> 0.60, CaO 0.02 MgO 0.08, SiO<sub>2</sub> 2.02) Kumhak-tong mine, Hakpang-ni, Changdo-myon, Kumhwa County.

-2-

- c. Lead and Zinc Komdok mine. Songchen mine, Changnim-ni, Changnim County, South Pyongan.
- d. Graphite (Volatile metal 1.78, C 86.08, Allo, Mi 0.04).
   Kaechon (125-55, 39-46) mine, Mon-ni, Puk-myon, Kaechon County; amorphous, C 85 percent.
   Tongbang (126-42, 40-59) mine, Sungbang, Kongin-myon, Kanggye County; crystaline, C 83 percent.
   Chonghak (128-58, 40-51) mine, Chonghak-myon, Maksong County, Morth Mongyong; crystaline, C 80 percent.
- e. Talc: Kumhak-tong mine.
- f. Tungsten (W03 70, Fe0 11.19, Mn0 2.09, Fe0Mno 5.1).

  Koksan mine, Kanak-mi, Iu-myon, Koksan County; W03 60 percent, associated with quartz, molybdenite, pyrite, zinc-blend, and fluorite.

  Mt. Diamond mine, Sinpung (128-05, 38-43), Oekumgang, Uiyang, Kangwon; W03 60 percent.
- g. Mica (associated with feldspar, dolomite, and granite).
  Ponyon mine (?Pchyon, 129-11, 11-03), Kilchu County.
- h. Molybdenum (molybdenite and galena).
  Suan (128-22, 38-42) mine, Manchong-ni, Taeo-nyon, Suan County.
- Special mines:
   Holgol (126-27, 38-52) mine, unrefined ore has 0.2 percent U03.
   Hard mica, Anak (125-30, 38-30), Sinchon (125-30, 38-21), Pyoksong (125-34, 38-20) area of Hwanghae.
   Molybdenite in various areas around the Suan mine.
- 5. Production of important minerals, by year, was as follows: \*\*

Mine	1945	1946	1947	1948	1949	<u>1950***</u>
Kumhwa (barium sulphate) Kumhwa (talc) Kaechon (graphe-		1.,397	4,224 2,880	4,300 2,600	6,500 2,200	3,600 1,600

6. Shipments to the USSR were handled by several methods. Gold and silver were sent through the North Korean Central Bank. According to one bank clerk, these shipments were classified as "harter" and amounted to a billion dollars. \*\*\*\*\* Material was handled at night, and was sent through North Korean Labor Party cells; the amount transmitted at each meeting was not known, and no details of forwarding the gold were given.

25X1X

Comment. A discussion of monazite mining in North Korea was given in 25X1A

25X1X

Comment. 1950 figures are as of 31 August.

25X1X

Comment. The unit of production here was not given.

25X1X

Comment. This is as received in English. The period covered was not stated, nor how the figures were arrived at.

25X1X \*\*\*\*

Comment. Figures in this paragraph do not entirely agree with those of paragraph 5. Since no specific source for either set of figures was supplied, the discrepancies cannot be resolved.
